Professional experience

Front-End Developer

08/2022 — Present

[dalvan c_](#)

- Manages **[dalvanc.com](#)**, sharing his journey in the field of front-end development and providing details about the projects undertaken, including the technologies employed in each.
- Develops responsive websites and applications (compatible with mobile devices) using modern CSS techniques and JavaScript libraries.
- Stays updated with the latest trends and technologies in front-end development, following best practices and prioritizing the maintainability and scalability of applications.

Coordinator

Topocart · 07/2019 — 08/2022 · Manaus, AM

- Effectively led office teams in Manaus and Brasília (the latter remotely) for the successful execution of tasks in projects across different locations in the country, contributing to operational efficiency and goal achievement.
- Contributed to the growth and development of the office team, from the hiring process to continuous training and management, fostering a productive work environment.
- Ensured stability and efficiency of the IT infrastructure in the Manaus office by leading the management and maintenance of workstations, servers, and storage in close collaboration with the company's IT team at the headquarters in Brasília.

Quality Assurance Analyst · 05/2017 — 07/2019 · Santa Cruz do Sul, RS

- Produced comprehensive reports highlighting the results of the data collected and processed during the **Mapa da Cidade** project, providing a clear overview of the progress and insights gained from 2017 to 2019.
- Ensured the integrity and reliability of field-collected information by implementing an effective quality control when updating the client's database, contributing to the accuracy and consistency of the material delivered by the company.
- Facilitated efficient communication between the company and the client, actively participating in weekly alignment meetings, ensuring a harmonious collaboration aligned with the project objectives.

IT Technician

IDB Informática · 01/2012 — 05/2017

- Led the technical support department for over 5 years, excelling in providing remote and on-site technical support to end users. Additionally, trained new technicians and implemented methods for detecting and resolving issues at both software and hardware levels.
- Performed on-site maintenance and management of IT and network infrastructure for corporate clients, significantly optimizing issue resolution. Ensured personalized assistance, precisely aligned with the individual needs of each case, resulting in more efficient infrastructure management and lasting customer satisfaction.
