- |      |            |
|------|------------|
| HTML | JavaScript |
| CSS  | TypeScript |
| Sass |            |

#### Libraries and frameworks

- |              |               |
|--------------|---------------|
| React        | GSAP          |
| Next.js      | Framer Motion |
| Tailwind CSS | Chart.js      |

#### Tools, platforms and others

- |            |        |
|------------|--------|
| Git        | Vercel |
| GitHub     | Figma  |
| PostgreSQL |        |

### Professional experience

#### Front-End Developer

[dalvan c\\_](#) · 08/2022 — Present

[dalvan c\\_](#)

- Development of responsive websites and applications (compatible with mobile devices) using modern CSS frameworks and JavaScript libraries such as **Tailwind CSS and React**.
- Constantly updated on the latest trends in front-end development, following best practices and prioritizing the **maintainability and scalability** of applications.
- Design and implementation of interfaces focused on improving **user experience (UX)** using component-based architectures, **resulting in modular and reusable front-end solutions**.
- Use of **REST APIs** for creating web applications, ensuring efficiency in data retrieval and interaction with back-end services.

#### Project Office Coordinator

[Topocart](#) · 07/2019 — 08/2021 · Manaus, AM

- Coordinated office teams in Manaus and Brasília (the latter remotely) in executing tasks for projects across different locations in the country, contributing to operational efficiency and goal achievement.
- Utilized **Jenkins** to automate repetitive tasks, ensuring the team always had updated material for analyses, increasing result accuracy.
- Contributed to the growth and development of the office team, from the hiring process to continuous training and management.
- Ensured stability and efficiency of the IT infrastructure in the Manaus office, **leading the management and maintenance of workstations, servers, and storage** in close collaboration with the company's IT team at the headquarters in Brasília.

#### Research and Mapping Agent III · 05/2017 — 07/2019 · Santa Cruz do Sul, RS

- Utilized database management systems such as **PostgreSQL** to process data collected throughout the project, creating queries that facilitated analysis and made comparison with the database provided by the client more efficient.
- Acted as an intermediary in communication between the company and the contractor, actively participating in weekly alignment meetings to ensure focus on project objectives.

#### IT Technician

[IDB Informática](#) · 01/2012 — 05/2017

- Led the technical support department **for over 5 years**, providing remote and on-site technical support to end users. Additionally, trained new technicians and established standards for problem detection and resolution at both software and hardware levels.
- Provided on-site maintenance and management of IT infrastructure and networks for corporate clients, optimizing time spent on problem resolution.

### Education

#### Bachelor of Engineering, Civil Engineering

[University of Santa Cruz do Sul - UNISC](#)  
2018

### Courses

- Google UX Design (in progress)
- The Creative JavaScript Course
- The Creative React Course
