Professional experience

Front-End Developer
08/2022 — Present

dalvan c_

- Develops responsive websites and applications (compatible with mobile devices) using modern CSS frameworks and JavaScript libraries like **Tailwind CSS and React.**
- Stays updated with the latest trends and technologies in front-end development, following best practices and prioritizing the **maintainability and scalability** of applications.
- Develops and implements interfaces with a focus on enhancing the **user experience (UX)** by utilizing component-based architectures, resulting in a **modular and reusable front-end solution.**
- Utilizes **RESTful APIs** to create web applications, ensuring an efficient data retrieval and interaction with back-end services.

Coordinator
Topocart · 07/2019 — 08/2021 · Manaus, AM

Topocart

- Led office teams in Manaus and Brasília (the latter remotely) for the successful execution of tasks in projects across different locations in the country, contributing to operational efficiency and goal achievement.
- Used **Jenkins** to automate repetitive tasks, ensuring that the team always had up-to-date material to perform analyses, improving process efficiency and result accuracy.
- Ensured stability and efficiency of the IT infrastructure in the Manaus office by **leading the management and maintenance of workstations, servers, and storage** in close collaboration with the company's IT team at the headquarters in Brasília.

Research and Mapping Agent · 05/2017 — 07/2019 · Santa Cruz do Sul, RS

- Utilized database management systems like **PostgreSQL** to handle the data collected throughout the project, creating queries that facilitated analysis and made comparison with the database provided by the client more efficient.
- Facilitated efficient communication between the company and the client, actively participating in weekly alignment meetings, ensuring a harmonious collaboration aligned with the project objectives.

IT Technician
IDB Informática · 01/2012 — 05/2017

IDB INFORMÁTICA

- Led the technical support department **for over 5 years**, excelling in providing remote and on-site technical support to end users. Additionally, trained new technicians and implemented methods for detecting and resolving issues at both software and hardware levels.
- Performed on-site maintenance and management of IT and network infrastructure for corporate clients, significantly optimizing issue resolution. Ensured personalized assistance, precisely aligned with the individual needs of each case, resulting in more efficient infrastructure management and lasting customer satisfaction.

Education

Bachelor of Engineering – BE, Civil Engineering
University of Santa Cruz do Sul - UNISC
2018

- The Creative JavaScript Course
